Lifting sling

Lifting slings, also known as lifting straps or hoisting belts, are strong and flexible straps used for lifting and moving heavy loads. They are made of durable materials such as polyester and feature loops at both ends for attachment to cranes or hoists. Lifting slings provide a safe and reliable way to lift loads on construction sites, in warehouses, and other industrial environments.

Product information

- Polyester yarn, double layer, premium quality
- CE-mark featured and manufactured according to the EN 1492-1 standard
- Temperature resistance -40°C up to +100°C
- Certification included
- Packing: each tied together and then labelled
- Transport packing in sturdy 3-layer carton boxes
- Delivery on Euro pallets (80×120cm)
