Round sling

Round slings, also known as endless slings, are flexible lifting devices made of high-strength synthetic fibers. They form a continuous loop, allowing for versatile and safe lifting of heavy loads. Round slings are lightweight, easy to handle, and resistant to abrasion and corrosion, making them ideal for various lifting applications in construction, manufacturing, and logistics industries.

Product information

- High quality polyester strap
- Safety factor 7:1
- CE-mark featured and manufactured according to EN 1492-2 standard
- Standard supplied with certificate of conformity
- Each round sling tied together and labelled
- Transport packing in 3-layer waterproof carton boxes
- Delivery on Euro pallets (80×120cm)
